This program is designed to help you...

1. Describe the science of improvement and use the Model for Improvement as a roadmap for improvement projects.
2. Employ skills to coach improvement teams on how to develop, test, and implement changes including identifying high-leverage change ideas and testing them using PDSA cycles.

This program is designed to help you...

3. Explain how to use data for improvement, including how to use and interpret run charts and other key quality improvement tools.
4. Develop skills in team facilitation, communication, decision making, and understanding team culture

This program is designed to help you...

5. Apply just-in-time teaching of improvement skills to team members in order to advance the team's work
6. Identify concepts of implementation, sustainability, spread, and scale-up.
